

2028 Labour Market Outlook

Industry Outlook

In British Columbia, five industries will account for about half of the total job openings projected over the next 10 years. At the top of this list are Health Care and Social Assistance which represent over 148,400 job openings; 16.4 percent of total job openings!

Education and Training Needs

Education and training will play an increasingly important role in the labour market over the next 10 years. A majority—77 percent—of the job openings expected in the next 10 years will require some level of post-secondary education or training.

High Opportunity Health Occupations

Employment in the Health sector is forecasted to continue to rise as BC's population ages. Health Care Assistants are ranked among the highest in-demand of all health professions.

1. Family physicians
2. Nurse practitioners
- ➔ 3. Health care assistants
